CHAPTER I

Regulations for Postgraduate Degree and Diploma Courses in Medical Sciences

1. Branch of Study

1.1 Postgraduate degree courses

Post Graduate Degree courses may be pursued in the following subjects:

a) MD (Doctor of Medicine)
   i) Anaesthesiology
   ii) Anatomy
   iii) Biochemistry
   iv) Community Medicine
   v) Dermatology, Venereology and Leprosy
   vi) Forensic Medicine
   vii) General Medicine
   viii) Microbiology
   ix) Pathology
   x) Paediatrics
   xi) Pharmacology
   xii) Physiology
   xiii) Psychiatry

b) MS (Master of Surgery)
   i) General Surgery
   ii) Obstetrics and Gynaecology
   iii) Ophthalmology
   iv) Orthopedics
   v) Oto-Rhino-Laryngology

1.2 Postgraduate Diploma Courses

Post Graduate Diploma Courses may be pursued in the following subjects:

a) Anesthesiaiology (DA)
b) Child Health (DCH)
c) Clinical pathology (DCP)
d) Dermatology, Venerology and Leprosy (DDVL)
e) Obstetrics and Gynaecology (DGO)
f) Ophthalmology (DO)
g) Orthopaedics (D Ortho)
h) Oto-rhino-laryngology (DLO)
i) Psychiatry (DPM)
2. Eligibility for Admission

**MD / MS Degree and Diploma courses** : A candidate affiliated to this University and who has passed final year MBBS examination after pursuing a study in a medical college recognized by the Medical Council of India, or from a recognized medical college affiliated to any other university recognized as equivalent thereto and has completed one year compulsory rotating internship in a teaching institution or other institution recognized by the Medical Council of India, and has obtained permanent registration of any State Medical Council, shall be eligible for admission.

3. Obtaining Eligibility Certificate by the University before making admission

No candidate shall be admitted for any Postgraduate Degree/Diploma courses unless the candidate has obtained and produced the eligibility certificate issued by the University. The candidate has to make an application to the University with the following documents along with the prescribed fee:

a) MBBS pass/degree certificate issued by the university.
b) Mark cards of all the university examinations passed before MBBS course.
c) Attempt certificate issued by the Principal.
d) Certificate regarding the recognition of the medical college by the Medical Council of India
e) Completion of internship certificate.
f) In case internship was done in a non-teaching hospital, a certificate from the Medical Council of India that the hospital has been recognized for internship.
g) Registration by any state Medical Council.
h) Proof of ST/SC or Category I, as the case may be.

Candidates should obtain the eligibility certificate before the last date for admission as notified by the university.

A candidate who has been admitted to postgraduate course should register his / her name in the university within a month of admission after paying the registration fee.

4. Intake of students

The intake of students to each course shall be in accordance with the MCI and GOI permissions in this regard.

5. Course of study

5.1 Duration

a) **MD, MS Degree Courses**: The course of study shall be for a period of 3 years consisting of 6 terms.
b) **Diploma courses**: The course of study shall be for a period of 2 years consisting of 4 terms.
6. Method of training

The training of postgraduate for degree/diploma shall be residency pattern, with graded responsibilities in the management and treatment of patients entrusted to his/her care. The participation of the students in all facets of educational process is essential. Every candidate should take part in seminars, group discussions, grand rounds, case demonstration, clinics, journal review meetings, CPC and clinical meetings. Every candidate should be required to participate in the teaching and training programme of undergraduate students. Training should include involvement in laboratory and experimental work, and research studies. Basic medical sciences students should be posted to allied and relevant clinical departments or institutions. Similarly, clinical subjects’ students should be posted to basic medical sciences and allied specialty departments or institutions.

7. Attendance, Progress and Conduct

7.1 A candidate pursuing degree/diploma course, should work in the concerned department of the institution for the full period as full time student. No candidate is permitted to run a clinic/laboratory/nursing home while studying postgraduate course, nor can he/she work in a nursing home or other hospitals/clinic/laboratory while studying postgraduate course.

7.2 Each year shall be taken as a unit for the purpose of calculating attendance.

7.3 Every student shall attend symposia, seminars, conferences, journal review meetings, grand rounds, CPC, case presentation, clinics and lectures during each year as prescribed by the department and not absent himself / herself from work without valid reasons.

7.4 Every candidate is required to attend a minimum of 80% of the training during each academic year of the post graduate course. Provided, further, leave of any kind shall not be counted as part of academic term without prejudice to minimum 80% attendance of training period every year.

7.5 Any student who fails to complete the course in the manner stated above shall not be permitted to appear for the University Examinations.

8. Monitoring Progress of Studies:

8.1 Work diary / Log Book: Every candidate shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the
candidate as well as details of clinical or laboratory procedures, if any, conducted by the candidate. The work diary shall be scrutinised and certified by the Head of the Department and Head of the Institution, and presented in the University practical/clinical examination.

8.2 Periodic tests: In case of degree courses of three years duration (MD/MS, DM, M Ch.), the concerned departments may conduct three tests, two of them be annual tests, one at the end of first year and the other at the end of the second year. The third test may be held three months before the final examination. The tests may include written papers, practical / clinical and viva voce. Records and marks obtained in such tests will be maintained by the Head of the Department and sent to the University, when called for.

8.3 In case of diploma courses of two years duration, the concerned departments may conduct two tests, one of them at the end of first year and the other in the second year, three months before the final examination. The tests may include written papers, practical / clinical and viva voce.

8.4 Records: Records and marks obtained in tests will be maintained by the Head of the Department and will be made available to the University or MCI.

9. Dissertation

9.1 Every candidate pursuing MD/MS degree course is required to carry out work on a selected research project under the guidance of a recognised post graduate teacher. The results of such a work shall be submitted in the form of a dissertation.

9.2 The dissertation is aimed to train a post graduate student in research methods and techniques. It includes identification of a problem, formulation of a hypothesis, search and review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, and comparison of results and drawing conclusions.

9.3 Every candidate shall submit to the Director (Academic) of the University in the prescribed proforma, a synopsis containing particulars of proposed dissertation work within six months from the date of commencement of the course, on or before the dates notified by the University. The synopsis shall be sent through proper channel.

9.4 Such synopsis will be reviewed and the dissertation topic will be registered by the University. No change in the dissertation topic or guide shall be made without prior approval of the University.
9.5 The dissertation should be written under the following headings

a) Introduction
b) Aims or Objectives of study
c) Review of Literature
d) Material and Methods
e) Results
f) Discussion
g) Conclusion
h) Summary
i) References
j) Tables
k) Annexure

9.6 The written text of dissertation shall be not less than 50 pages and shall not exceed 150 pages excluding references, tables, questionnaires and other annexure. It should be neatly typed in double line spacing on one side of paper (A4 size, 8.27” x 11.69”) and bound properly. The dissertation shall be certified by the guide, head of the department and head of the Institution.

9.7 Four copies of dissertation thus prepared shall be submitted to the Registrar (Evaluation), six months before final examination, on or before the dates notified by the University.

9.8 The dissertation shall be valued by examiners appointed by the University. Approval of dissertation work is an essential precondition for a candidate to appear in the University examination.

9.9 **Guide:** The academic qualification and teaching experience required for recognition by this University as a guide for dissertation work is as per Medical Council of India, Minimum Qualifications for Teachers in Medical Institutions Regulations, 1998. Teachers in a medical college/institution having a total of eight years teaching experience out of which at least five years teaching experience as Lecturer or Assistant Professor gained after obtaining post graduate degree shall be recognised as post graduate teachers.

9.10 **Co Guide:** A Co-guide may be included provided the work requires substantial contribution from a sister department or from another medical institution recognised for teaching/training by JSS University / Medical Council of India. The co-guide shall be a recognised post graduate teacher of JSS University.

9.11 **Change of guide:** In the event of a registered guide leaving the college for any reason or in the event of death of guide, guide may be changed with prior permission from the university.
10. Schedule of Examination
The examination for MD / MS courses shall be held at the end of three academic years (six academic terms). The examination for DM and M Ch courses shall be held at the end of three years. The examination for the diploma courses shall be held at the end of two academic years (four academic terms). For students who have already passed Post Graduate Diploma and appearing for MD examination, the examination shall be conducted after two academic years (four academic terms, including submission of dissertation) The University shall conduct two examinations in a year at an interval of four to six months between the two examination. Not more than two examinations shall be conducted in an academic year.

11. Scheme of Examination
11.1 MD / MS Degree
MD / MS Degree examinations in any subject shall consist of dissertation, written paper (Theory), Practical/Clinical and Viva voce.

11.1.1 Dissertation: Every candidate shall carry out work and submit a dissertation as indicated in Sl NO 9. Acceptance of dissertation shall be a precondition for the candidate to appear for the final examination.

11.1.2 Written Examination (Theory): A written examination shall consist of four question papers, each of three hours duration. Each paper shall carry 100 marks. Out of the four papers, the 1st paper in clinical subjects will be on applied aspects of basic medical sciences. Recent advances may be asked in any or all the papers. In basic medical subjects and para-clinical subjects, questions on applied clinical aspects should also be asked.

11.1.3 Practical / Clinical Examination: In case of practical examination, it should be aimed at assessing competence and skills of techniques and procedures as well as testing student’s ability to make relevant and valid observations, interpretations and inference of laboratory or experimental work relating to his/her subject.

In case of clinical examination, it should aim at examining clinical skills and competence of candidates for undertaking independent work as a specialist. Each candidate should examine at least one long case and two short cases.

The total marks for Practical / clinical examination shall be 200.

11.1.4 Viva Voce. Viva Voce Examination shall aim at assessing depth of knowledge, logical reasoning, confidence and oral communication skills. The total marks shall be 100 and the distribution of marks shall be as under:
i) For examination of all components of syllabus 80 Marks

ii) For Pedagogy 20 Marks

If there is skills evaluation, 10 marks shall be reserved for Pedagogy and 10 marks for skill evaluation.

11.1.5 Examiners. There shall be at least four examiners in each subject. Out of them, two shall be external examiners and two shall be internal examiners. The qualification and teaching experience for appointment as an examiner shall be as laid down by the Medical Council of India.

11.1.6 Criteria for declaring as pass in University Examination*. A candidate shall secure not less than 50% marks in each head of passing which shall include (1) Theory, (2) Practical including clinical and viva-voce examination.

A candidate securing less than 50% of marks as described above shall be declared to have failed in the examination. Failed candidate may appear in any subsequent examination upon payment of fresh fee to the Registrar (Evaluation).

11.1.7 Declaration of class: A successful candidate passing the University examination in first attempt and secures grand total aggregate 75% of marks or more will be declared to have passed the examination with distinction, 65% but below 75% declared as First Class and 50% but below 65% declared as Second Class.

A candidate passing the University examination in more than one attempt shall be declared as Pass Class irrespective of the percentage of marks.

11.2 DM/M Ch

The examination shall consist of theory, clinical/practical and viva voce examination.

11.2.1 Theory (Written Examination): The theory examination shall consist of four question papers, each of three hours duration. Each paper shall carry 100 marks. Out of the four papers, the first paper will be on basic medical sciences. Recent advances may be asked in IV Paper.

11.2.2 Practical / Clinical Examination: In case of practical examination it should be aimed at assessing competence, skills of techniques and procedures as well as testing student’s ability to make relevant and valid observations, interpretations and experimental work relevant to his / her subject.
In case of clinical examination it should aim at examining clinical skills and competence of candidates for undertaking independent work as a specialist. Each candidate should examine at least one long case and two short cases.

The maximum marks for Practical / Clinical shall be 200.

11.2.3 **Viva-Voce:** Viva Voce examination shall aim at assessing thoroughly, depth of knowledge, logical reasoning, confidence and oral communication skills. The maximum marks shall be 100. This also includes spotters like instruments, anaesthesia machines, drugs, ECG, X - ray.

11.2.4 **Examiners:** There shall be at least four examiners in each subject. Out of them, two shall be external examiners and two shall be internal examiners. The qualification and teaching experience for appointment as an examiner shall be as laid down by the Medical Council of India.

11.2.5 **Criteria for declaring as pass in University Examination**: A candidate shall secure not less than 50% marks in each head of passing which shall include (1) Theory (2) Practical including clinical and viva voce examination.

A candidate securing less than 50% of marks as described above shall be declared to have failed in the examination. Failed candidate may appear in any subsequent examination upon payment of fresh fee to the Registrar (Evaluation).

11.3 **Diploma Examination:**

Diploma examination in any subject shall consist of theory (written papers), Practical / Clinical and Viva - Voce.

11.3.1 **Theory:** There shall be three written question papers each carrying 100 marks. Each paper will be of three hours duration. In clinical subjects one paper out of this shall be on basic medical sciences. In basic medical subjects and Para- clinical subjects, questions on applied clinical aspects should also be asked.

11.3.2 **Practical Clinical Examination:** In case of practical examination it should be aimed at assessing competence, skills related to laboratory procedures as well as testing students ability to make relevant and valid observations, interpretation of laboratory or experimental work relevant to his/her subject.

In case of clinical examination, it should aim at examining
clinical skills and competence of candidates for undertaking independent work as a specialist. Each candidate should examine at least one long case and two short cases.

The maximum marks for Practical / Clinical shall be 150.

11.3.3 **Viva Voce Examination.** Viva Voce examination should aim at assessing depth of knowledge, logical reasoning, confidence and oral communication skills. The total marks shall be 50. This also includes spotters like instruments, anesthesia machines, drugs, ECG, X-ray.

11.3.4 Criteria for declaring as pass in University Examination* A candidate shall secure not less than 50% marks in each head of passing which shall include (1) Theory, (2) Practical including clinical and viva voce examination.

A candidate securing less than 50% of marks as described above shall be declared to have failed in the examination. Failed candidate may appear in any subsequent examination upon payment of fresh fee to the Registrar (Evaluation).

11.3.5 **Declaration of distinction.** A successful candidate passing the University examination in first attempt will be declared to have passed the examination with distinction, if the grand total aggregate marks is **75 percent and above.** Distinction will not be awarded for candidates passing the examination in more than one attempt.

11.3.6 **Examiners.** There shall be at least four examiners in each subject. Out of them, two shall be external examiners and two shall be internal examiners. The qualification and teaching experience for appointment as an examiner shall be as laid down by the Medical Council of India.

**12. Number of Candidates per day**

The maximum number of candidates for practical / clinical and viva-voce examination shall be as under:

- **MD /MS Course:** Maximum of 6 per day.
- **Diploma Course:** Maximum of 8 per day.
CHAPTER II

GOALS AND GENERAL OBJECTIVES OF POSTGRADUATE MEDICAL EDUCATION PROGRAM

GOAL

The goal of postgraduate medical education shall be to produce competent specialists and/or medical teachers:

1. Who shall recognize the health needs of the community and carry out professional obligations ethically and in keeping with the objectives of the national health policy.

2. Who shall have mastered most of the competencies, pertaining to the speciality, that are required to be practiced at the secondary and the tertiary levels of the health care delivery system.

3. Who shall be aware of the contemporary advance and developments in the discipline concerned.

4. Who shall have acquired a spirit of scientific inquiry and is oriented to the principles of research methodology and epidemiology and

5. Who shall have acquired the basic skills in teaching of the medical and paramedical professionals.

GENERAL OBJECTIVES

At the end of the postgraduate training in the discipline concerned the student shall be able to:

1. Recognize the importance to the concerned speciality in the context of the health needs of the community and the national priorities in the health section.

2. Practice the speciality concerned ethically and in step with the principles of primary health care.

3. Demonstrate sufficient understanding of the basic sciences relevant to the concerned speciality.

4. Identify social, economic, environmental, biological and emotional determinants of health in a given case, and take them into account while planning therapeutic, rehabilitative, preventive and primitive measure/strategies.

5. Diagnose and manage majority of the conditions in the speciality concerned on the basis of clinical assessment, and appropriately selected and conducted investigations.
6. Plan and advice measures for the prevention and rehabilitation of patients suffering from disease and disability related to the speciality.

7. Demonstrate skills in documentation of individual case details as well as morbidity and mortality rate relevant to the assigned situation.

8. Demonstrate empathy and humane approach towards patients and their families and exhibit interpersonal behaviour in accordance with the societal norms and expectations.

9. Play the assigned role in the implementation of national health programme, effectively and responsibly.

10. Organize and supervise the chosen/assigned health care services demonstrating adequate managerial skills in the clinic/hospital or the field situation.

11. Develop skills as a self-directed learner, recognize continuing education needs; select and use appropriate learning resources.

12. Demonstrate competence in basic concepts of research methodology and epidemiology, and be able to critically analyze relevant published research literature.

13. Develop skills in using educational methods and techniques as applicable to the teaching of medical/nursing students, general physicians and paramedical health workers.

14. Function as an effective leader of a health team engaged in health care, research or training.

**STATEMENT OF THE COMPETENCIES:** Keeping in view the general objectives of postgraduate training, each discipline shall aim at development of specific competencies which shall be defined and spelt out in clear terms. Each department shall produce a statement and bring it to the notice of the trainees in the beginning of the programme so that he or she can direct the efforts towards the attainment of these competencies.

**COMPONENTS OF THE POSTGRADUATE CURRICULUM:**
The major components of the Postgraduate curriculum shall be:

- Theoretical knowledge
- Practical and clinical skills
- Thesis skills.
- Attitudes including communication skills.
- Training in research methodology.

(Source: Medical Council of India, Regulations on Postgraduate Medical Education, 2000)
CHAPTER III

POST GRADUATE COURSES IN PSYCHIATRY

MD PSYCHIATRY

Goal:

The candidates are expected to attain a high degree of proficiency both in theoretical and practical aspects of psychiatry and related disciplines.

The goals of postgraduate training course would be to train a MBBS doctor who will:

- Practice efficiently and effectively the speciality, backed by scientific knowledge and skill base.
- Exercise empathy and a caring attitude and maintain high ethical standards.
- Continue to evince keen interest in continuing education in the speciality, irrespective of whether he is in a teaching institution or is a practicing psychiatrist.
- Be a motivated ‘teacher’ – defined as a specialist keen to share his knowledge and skills with a colleague or a junior or any learner.

Objectives:

The following objectives are laid out to achieve the goals of the course. These objectives are to be achieved by the time the candidate completes the course. The Objectives may be considered under the following subheadings:

1. Knowledge (Cognitive domain)
2. Skills (Psycho motor domain)
3. Human values, Ethical practice and Communication abilities

Knowledge:

- Describe aetiology, patho-physiology, principles of diagnosis and management of common psychiatric problems including emergencies, in adults and children.
- Identify social, economic, environmental and emotional determinants in a given case, and take them into account for planning therapeutic measures.
- Recognize conditions that may be outside the area of his specialty/competence and to refer them to the proper specialist.
- Advice regarding the management of the case and to carry out this management effectively.
• Update himself by self study and by attending courses, conferences and seminars relevant to the specialty.
• Teach and guide his team, colleagues and other students.
• Undertake audit, use information technology tools and carry out research, both basic and clinical, with the aim of publishing his work at various scientific fora.

Skills:

• Take a proper clinical history, examine the patient, perform essential diagnostic procedures and order relevant tests and interpret them to come to a reasonable diagnosis about the condition.
• Conduct interviews both of adults and children and of uncooperative patients.
• Perform mental state examination including that of uncooperative patients.
• Document psychiatric history, family history and mental state examination.
• Assess personality including administration and interpretation of projective tests. Administer and interpret tests of intelligence and neuropsychological functions.
• Perform common therapeutic procedures.
• Provide basic life saving support services (BLS) in emergency situations.

Human values, ethical practice and communication abilities.

• Adopt ethical principles in all aspects of his / her practice. Professional honesty and integrity are to be fostered. Care is to be delivered irrespective of the social status, caste, creed or religion of the patient.
• Develop communication skills, in particular the skill to explain various options available in management and to obtain a true informed consent from the patient.
• Prove leadership and get the best out of his team in a congenial working atmosphere.
• Apply high moral and ethical standards while carrying out human or animal research.
• Be humble and accept the limitations in his knowledge and skill and to ask for help from colleagues when needed.
• Respect patient’s right and privileges including patient’s right to information and right to seek a second op
Course Contents

Knowledge:

A candidate pursuing a course in MD (Psychiatry) is expected to possess adequate knowledge in the following areas:

- Clinical features, aetio-pathogenesis and treatment of various adult psychiatric disorders including personality disorders, substance abuse disorders, sexual disorders and sleep disorders.
- Clinical features, aetio-pathogenesis and treatment of common childhood and adolescent psychiatric disorders including issues of special relevance to that age group.
- Clinical and treatment issues related to geriatric psychiatry.
- Classificatory systems in psychiatry, especially, International Classification of Diseases (ICD) and Diagnostic and Statistical Manual (DSM).
- Consultation – liaison psychiatry, identification and management of psychiatric emergencies.
- Community psychiatry: The student should be familiar with various issues and principles underlying community psychiatry, epidemiology of psychiatric disorders with special relevance to India and different models of mental health delivery care systems. It is also essential that a student understands issues pertaining to the field of preventive psychiatry (primary, secondary and tertiary prevention).
- Psychiatric complications of medical illness including identification and treatment of various organic psychiatric disorders such as delirium, dementias and amnestic syndromes.
- Various methods of therapeutic intervention including drug therapy, electroconvulsive therapy, psychotherapy (individual, marital, family and group therapy) and behavioral therapy. Principles and methods of treatment applied to rehabilitation of psychiatrically ill individuals. Students should be familiar with terms such as impairment, disability and handicap.
- Various laws pertaining to the rights, treatment and care of individuals with psychiatric disorders such as Mental Health Act, Disability Act etc.
- Medical ethics in general and special ethical concerns as it applies to the practice of clinical psychiatry.
- Various theories of adult personality, learning theories, issues pertaining to intelligence and its measurements, psychological theories of emotion motivational aspects of behavior, thinking, memory and developmental psychology.
• Principles and interpretation of psychological tests (adults, children) such as projective tests, tests of intelligence, tests of cognitive and neuropsychological functions.

• Common instruments used in the diagnostic assessment and measurement of change in clinical status of various psychiatric disorders.

• Basic sciences as applicable to psychiatry such as neurophysiology, neuroanatomy, neurochemistry, genetics, chronopsychobiology, general psychology, social psychology (attitudes and its measurement, language and communication, culture, group dynamics, theories of attribution), anthropology and ethology.

• Students should be familiar with theoretical aspects of various neuroimaging techniques such as CT scan, PET Scan, MRI etc. It is necessary that student should be able interpret CT scan of the brain. Similarly, familiarity with various electrophysiological techniques such as EEG and evoked potentials is desirable, with a practical knowledge of EEG being necessary.

• Principles of research methodology: types of experimental designs, setting up a hypothesis, basic techniques, ethical issues with special emphasis on informed consent and patient confidentiality. Students must also be familiar with issues related to choosing a topic dissertation/research, library work including collecting references and reviewing relevant literature.

Skills

A student must acquire practical skills in:

• Interview techniques both adults and children and of uncooperative patients.

• Mental state examination including that of uncooperative patients

• Documentation of psychiatric history, family history and mental state examination.

• Assessment of personality including administration and interpretation of projective tests. Administration and interpretation of tests of intelligence and neuropsychological functions.

Attitudes and Communication abilities

Students must learn to work with a multidisciplinary team including other mental health professionals. It is also essential that students learn to communicate effectively with physicians, other specialists and other health care agencies.
Teaching / Learning activities

A candidate pursuing the course should work in the institution as a full time student. No candidate should be permitted to run a clinic / laboratory / nursing home while studying postgraduate course. Each year should be taken as a unit for the purpose of calculating attendance.

Every student shall attend teaching and learning activities during each year as prescribed by the department and not absent himself / herself from work without valid reasons.

A list of teaching and learning activities designed to facilitate students acquire essential knowledge and skills outlined is given below.

1. Lectures: Lectures are to be kept to a minimum. They may, however, be employed for teaching certain topics. Lectures may be didactic or integrated.
   a. Didactic Lectures: Recommended for selected common topics for post graduate students of all specialities. Few topics are suggested as examples:
      i. Bio-statistics
      ii. Use of library
      iii. Research methods
      iv. Medical code of conduct and medical ethics
      v. National Health and Disease Control Programmes
      vi. Communication skills etc.
      These topics may preferably taken up in the first few weeks of the 1st year.
   b. Integrated Lectures: These are recommended to be taken by multidisciplinary teams for selected topics, eg. Jaundice, diabetes mellitus, Thyroid, etc.

2. Journal Club: Recommended to be held once a week. All the PG students are expected to attend and actively participate in discussion and enter in the log book relevant details. Further, every candidate must make a presentation from the allotted journal(s), selected articles at least four times a year and a total of 12 seminar presentations in three years. The presentations would be evaluated using check lists and would carry weightage for internal assessment (See checklist in chapter IV). A time table with names of the student and the moderator should be announced at the beginning of every year.

3. Subject Seminar: Recommended to be held once a week. All the PG students are expected to attend and actively participate in discussion and enter in the log book relevant details. Further, every candidate must
present on selected topics at least four times a year and a total of 12 seminar presentations in three years. The presentations would be evaluated using check lists and would carry weightage for internal assessment (See checklist in chapter IV). A time table for the subject with names of the student and the moderator should be scheduled at the beginning of the year.

4. **Student symposium:** Recommended as an optional multi disciplinary programme. The evaluation may be similar to that described for subject seminar.

5. **Ward rounds:** Ward rounds may be service or teaching rounds.
   
a. **Service rounds:** Postgraduate students and interns should do rounds every day for the care of the patients. Newly admitted patients should be worked up by the PGs and presented to the seniors the following day.
   
b. **Teaching rounds:** Every unit should have ‘grand rounds’ for teaching purpose. A dairy should be maintained for day to day activities by the students.
   
c. A minimum of 40 clinical cases must be seen every year and a minimum of 10 cases be taken up for psycho therapy each year Entries of (a), (b) and (c) should be made in the log book.

6. **Clinico – pathological conference:** Recommended at least once in three months for all post graduate students. Presentation shall be done by rotation. If cases are not available due to lack of clinical postmortems, it could be supplemented by published CPCs.

7. **Inter departmental meetings:** Strongly recommended particularly with departments of Pathology and Radio – diagnosis at least once a week. These meetings should be attended by post graduate students and relevant entries must be made in the log book.
   
   - **Pathology:** A dozen interesting cases may be chosen and presented by the post graduate students and discussed by them as well as the senior staff of the department. The staff of Pathology department would then show the slides and present final diagnosis. In these sessions the advanced immuno-histo-chemical techniques, the burgeoning markers & other recent development can be discussed.
   
   - **Radio–diagnosis:** Interesting cases and the imaging modalities should be discussed.
8. **Teaching Skills:** Post graduate students must teach under graduate students (eg. medical, nursing) by taking demonstrations, bed side clinics, tutorials, lectures etc. Assessment is made using a checklist by surgery faculty as well students. (See model checklist in Chapter IV). Record of their participation shall be kept in log book. Training of post graduate students in educational science and technology is recommended.

9. **Continuing medical education programmes (CME):** Recommended that at least 2 state level CME programmes should be attended by each student in 3 years.

10. **Conferences:** Attending conferences is optional. However it is encouraged.

**Dissertation:**

1. Every candidate pursuing MD/MS degree course is required to carry out work on a selected research project under the guidance of a recognized post graduate teacher. The results of such a work shall be submitted in the form of a dissertation.

2. The dissertation is aimed to train a post graduate student in research methods and techniques. It includes identification of a problem, formulation of a hypothesis, search and review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, comparison of results and drawing conclusions.

3. Every candidate shall submit to the Registrar (Academic) of JSS University in the prescribed proforma, a synopsis containing particulars of proposed dissertation work six months from the date of commencement of the course, on or before the dates notified by the University. The synopsis shall be sent through proper channel.

4. Such synopsis will be reviewed and the dissertation topic will be registered by the University. No change in the dissertation topic or guide shall be made without prior approval of the University.

5. The dissertation should be written under the following headings:
   a. Introduction
   b. Aims and/or objectives of study
   c. Review of literature
   d. Material and Methods
   e. Results
   f. Discussion
   g. Conclusion
   h. Summary
   i. References (Vancouver style)
   j. Tables
   d. Annexures
6. The written text of dissertation shall be not less than 50 pages and shall not exceed 150 pages excluding references, tables, questionnaires and other annexures. It should be neatly typed in double line spacing on one side paper (A4 size, 8.27” x 11.69”) and bound properly. Spiral binding should be avoided. The dissertation shall be certified by the guide, head of the department and head of the institution.

7. Four copies of dissertation thus prepared shall be submitted to the Registrar (Evaluation), six months before final examination, on or before the dates notified by the University.

8. The dissertation work is an essential precondition for a candidate to appear in the University examination.

9. For some more details regarding guide etc., please see Chapter I and for books on research methodology, ethics, etc., see Chapter IV.

Psychometry / Psychotherapy Records:

Five fully worked-out diagnostic and psychotherapy records, out of which one should be child therapy record. The records should include a summary of the clinical history organized under relevant headings, and a discussion on Reasons for intervention(s),

a. Areas to be focused including short- and long-term objectives,
b. Type and technique of intervention employed and rationale
c. Therapy processes,
d. Changes in therapy or objectives, if any and the reasons for the same,
e. Outcome,
f. Prevention strategies,
g. Future plans

Graded responsibility in care of patients

1st Year:

Interview techniques, mental state examination, diagnostic summary, diagnostic formulation, supervised inpatient and outpatient work, supervised administration of ECT, administration and interpretation of psychological tests (projective tests, tests of intelligence, neuropsychological tests).

2nd Year

Supervised consultation and liaison work with order departments, evaluation and treatment of psychiatric emergencies under supervision, supervised long term follow up of inpatients discharged to the community, individual psychotherapy of a minimum of one case under supervision, exposure of group therapy family therapy. Students shall learn certain behavior therapy techniques such as relaxation, systematic
desensitization, exposure and response prevention. Assessment and evaluation of children with psychiatric problems. Postings in the Department of Neurology (3 months) and in a psychiatric institution for exposure to Forensic Psychiatry (15 days).

3rd Year

Supervised teaching of clinical psychiatry to undergraduate medical students, psychiatry nursing students etc. Independent care of long term stable patients in the community and outpatient. Learning to liaise with agencies outside the hospital setting for community care of patients and if possible, to work in a centre dealing with rehabilitation of chronic psychiatrically ill patients (15 days). Presentation of dissertation work to the faculty of the department. In-patient and out-patient work under supervision.

Rotation and Posting in other departments

Allied Subjects:

- Department of Neurology (3 months duration)
- Department of Medicine – Consultation – Liaison Psychiatry (1 month)
- Forensic psychiatry – 15 days
- Department of clinical psychology (where a separate department exists) or supervised clinical work under a clinical psychologist – 1 month duration.
- Child Psychiatry – 3 months.

Training in Teaching skills and Research methodology

Research methodology – in the form of didactic lectures and interactive seminars with both clinician and statistician. Selection of a dissertation topic, library work involving review of relevant literature, writing up a protocol and setting up a hypothesis, basic statistical techniques (5-6 hours during the 1st year of training) Learning to critically evaluate research articles (2nd and 3rd year) published in various scientific journals.

Teaching Skills

Training in teaching skills including learning to use audiovisual aids, supervised teaching of undergraduate medical students and nursing students in clinical psychiatry in the 3rd year of training.

Orientation Programme

Orientation programme regarding use of library, laboratory and hospital procedures, regulations concerning hospital admission and discharges during the first two months of clinical posting.
Monitoring Learning Progress

It is essential to monitor the learning progress of each candidate through continuous appraisal and regular assessment. It not only also helps teachers to evaluate students, but also students to evaluate themselves. The monitoring shall be done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment be done using checklists that assess various aspects. Checklists are given in Chapter IV.

The learning outcomes to be assessed should include:

1. Personal attitudes
2. Acquisition of knowledge
3. Clinical and operative skills
4. Teaching skills
5. Dissertation

1. **Personal Attitudes:** The essential items are:
   - Caring attitude
   - Initiative
   - Organizational ability
   - Potential to cope with stressful situations and undertake responsibility
   - Trust worthiness and reliability
   - To understand and communicate intelligibly with patients and others
   - To behave in a manner which establishes professional relationships with patients and colleagues
   - Ability to work in a team.
   - A critical enquiring approach to the acquisition of knowledge.

The methods used mainly consist of observation. It is appreciated that these items require a degree of subjective assessment by the guide, supervisors and peers.

2. **Acquisition of knowledge:** The methods used comprise of ‘Log Book’ which records participation in various teaching / learning activities by the students. The number of activities attended and the number in which presentations are made are to be recorded. The log book should periodically be validated by the supervisors. Some of the activities are listed. The list is not complete. Institutions may include additional activities, if so, desired.

   **Journal review meeting (Journal Club):** The ability to do literature search, in depth study, presentation skills, and use of audio – visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting using a checklist (see Model Checklist – I, Chapter IV)
**Seminars / Symposia:** The topics should be assigned to the student well in advance to facilitate in depth study. The ability to do literature search, in depth study, presentation skills and use of audio – visual aids are to be assessed using a checklist (see Model Checklist II, Chapter IV)

**Clinico – pathological conferences:** This should be a multidisciplinary case study of an interesting case to train the candidate to solve diagnostic and therapeutic problems by using an analytical approach. The presentation(s) are to be assessed using a checklist similar to that used for seminar.

**Medical Audit:** Periodic morbidity and mortality meeting be held. Attendance and participation in these must be insisted upon. This may not be included in assessment.

3. **Clinical Skills:**

   **Day to Day work:** Skills in outpatient and ward work should be assessed periodically. The assessment should include the candidate’s sincerity and punctuality, analytical ability and communication skills (see Model Checklist III, Chapter IV)

   **Clinical Meeting:** Candidates should periodically present cases to his peers and faculty members. This should assessed using a check list (see Model Checklist IV, Chapter IV)

   **Clinical and Procedural skills:** The candidate should be given graded responsibility to enable learning by apprenticeship. The performance is assessed by the guide by direct observation. Particulars are recorded by the student in the log book. (Table No. 3, Chapter IV)

4. **Teaching skills:** Candidates should be encouraged to teach undergraduate medical students and paramedical students, if any. This performance should be based on assessment by the faculty members of the department and from feedback from the undergraduate students. (See Model Checklist V, Chapter IV)

5. **Dissertation in the Department:** Periodic presentations are to be made in the department. Initially the topic selected is to be presented before submission to the University for registration, again before finalization for critical evaluation and another before final submission of the completed work (see Model Checklist IV & VII, Chapter IV)

6. **Periodic tests:** The department may conduct three tests, two of them be annual tests, one at the end of first year and the other in the second year.
The third test may be held three months before the final examination. The tests may include written papers, practical / clinical and viva voce.

7. Work diary / Look Book: Every candidate shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical or laboratory procedures, if any conducted by the candidate.

8. Records: Records, log books and marks obtained in tests will be maintained by the Head of the Department and will be made available to the University or MCI.

Log Book

The log book is a record of the important activities of the candidates during his training. Internal assessment should be based on the evaluation of the log book. Collectively, log books are a tool for the evaluation of the training programme of the institution by external agencies. The record includes academic activities as well as the presentations and procedures carried out by the candidate.

Format for the log book for the different activities is given in Tables 1, 2 and 3 of Chapter IV. Copies may be made and used by the institutions.

Procedure for defaulters: Every department should have a committee to review such situations. The defaulting candidate is counseled by the guide and head of the department. In extreme cases of default the departmental committee may recommended that defaulting candidate be withheld from appearing the examination, if she/he fails to fulfill the requirements in spite of being given adequate chances to set himself or herself right.

Scheme of Examination

1. Theory: There shall be four question papers, each of three hours duration. Each paper shall consist of two long essay questions each questions carrying 20 marks and 6 short essay questions each carrying 10 marks. Total marks for each paper will be 100. Questions on recent advances may be asked in any or all the papers. Details of distribution of topics for each paper will be as follows:

   Paper I: Neuroanatomy, neurophysiology, neurochemistry, genetics, general and abnormal psychology, social psychology, anthropology, ethology and statistics.

   Paper II: History of psychiatry, classificatory systems in psychiatry, adult psychiatric disorders including personality disorder substance related disorders, sexual disorders, eating disorders, sleep disorders (epidemiology

**Paper III:** Child and adolescent psychiatric disorders including mental retardation (Epidemiology aetio-pathogenesis, clinical features treatment course and outcome). Mental health issues in women including post-partum psychiatric disorders, measurements in psychiatry, psychopharmacology, electroconvulsive therapy, psychosurgery, psychotherapy, rehabilitation in psychiatry, forensic psychiatry, cultural psychiatry, community psychiatry and ethics in psychiatry.

**Paper IV:** Neurology and medicine related to psychiatry.

*Note: The distribution of chapters / topics shown against the papers are suggestive only.*

### 2. Clinical Examination  
**Marks: 200**

- **Board of examination:** The board of examiners consist of four members.
- **Out of four one should be Neurologist / Clinical Psychologist**
- **Aim of the clinical examination is to elicit the knowledge and competency of the candidate for undertaking independent work as specialist / teacher**

   Long cases – Two: Psychiatry – One – 75  
   Neurology – One – 75

   Short cases – Two: Psychiatry – Two – 50 (2 X 25)

### 3. Viva Voce  
**Marks: 100**

**a. Viva – voce examination:** (80 Marks)

All examiners will conduct viva – voce conjointly on candidate’s comprehension, analytical approach, expression and interpretation of data. It includes all components of course contents. In addition candidates may be also be given case reports, charts, gross specimens, histo pathology slides, X-rays, ultrasound, CT scan images, etc., for interpretation. Question
on use of instruments will be asked. It includes discussion on dissertation also.

b. Pedagogy exercise (20 Marks)

A topic shall be given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8 – 10 minutes.

11. Psychological Medicine
12. Journal of Clinical Psychiatry
DIPLOMA IN PSYCHIATRY (DPM)

Goal

The candidates are expected to attain a high degree of proficiency both in the theoretical and practical aspects of psychiatry and related disciplines.

The goals of postgraduate training course would be to train a MBBS doctor who will:

Practice efficiently and effectively the specialty, backed by scientific knowledge and skill base. Exercise empathy and a caring attitude and maintain high ethical standards. Continue to evince keen interest in continuing education in the speciality. Be a motivated ‘teacher’ – defined as a specialist keen to share his knowledge and skills with a colleague or a junior or any learner.

Objectives

The following objectives are laid out to achieve the goals of the course. These objectives are to be achieved by the time the candidate completes the course. The Objectives may be considered under the subheadings:

1. Knowledge (cognitive domain)
2. Skills (psycho motor domain)
3. Human values, ethical practice and communication abilities

Knowledge:

- Describe aetiology, patho-physiology, principles of diagnosis and management of common psychiatric problems including emergencies, in adults and children
- Identify social, economic, environmental and emotional determinants in a given case, and take them into account for planning therapeutic measures.
- Recognize conditions that may be outside the area of his specialty / competence and to refer them to the proper specialist.
- Advice regarding the management of the case and to carry out this management effectively.
- Update himself by self study and by attending courses, conferences and seminars relevant to the speciality.
- Undertake audit, use information technology tools and participate in clinical research, with the aim of and presenting or publishing his / her work at various scientific fora.
Skills

- Take a proper clinical history, examine the patient, perform essential diagnostic procedures and order relevant tests and interpret them to come to a reasonable diagnosis about the condition.
- Conduct interviews both in adults and children and of uncooperative patients.
- Perform mental state examination including that of uncooperative patients.
- Document psychiatric history, family history and mental state examination.
- Assess personality including administration and interpretation of projective tests, Administer and interpret tests of intelligence and Neuropsychological functions.
- Perform common therapeutic procedures.
- Provide basic life saving support service (BLS) in emergency situations.

Human values, Ethical practice and Communication abilities

- Adopt ethical principles in all aspects of his / her practice. Professional honesty and integrity are to be fostered. Care is to be delivered irrespective of the social status, caste, creed or religion of the patient.
- Develop communication skills, in particular the skill to explain various options available in management and to obtain a true informed consent from the patient.
- Provide leadership and get the best out of his team in a congenial working atmosphere.
- Apply high moral and ethical standards while carrying out human or animal research.
- Be humble and accept the limitations in his knowledge and skill and to ask for help from colleagues when needed.
- Respect patient’s rights and privileges including patient’s right to information and right to seek a second opinion.
Course Contents

Knowledge

A candidate pursuing a course in Diploma in Psychiatry is expected to possess optimal knowledge in the following areas:

- Clinical features, aetio-pathogenesis and treatment of various adult psychiatric disorders including personality disorders, substance abuse disorders, sexual disorders and sleep disorders.
- Clinical features, aetio-pathogenesis and treatment of common childhood and adolescent psychiatric disorders including issues of special relevance to that age group.
- Clinical and treatment issues related to Geriatric psychiatry.
- Classificatory system in psychiatry, especially, International Classification of Diseases (ICD) and Diagnostic and Statistical Manual (DSM).
- Consultation – Liaison psychiatry, identification and management of psychiatric emergencies.
- Community psychiatry: The student should be familiar with various issues and principles underlying community psychiatry, epidemiology of psychiatric disorders with special relevance to India and different models of mental health delivery care systems. It is also essential that a student understands issues pertaining to the field of preventive psychiatry (Primary, secondary and tertiary prevention).
- Psychiatric complications of medical illnesses including identification and treatment of various organic psychiatric disorders such as delirium, dementias and amnestic syndromes.
- Various methods of therapeutic intervention including drug therapy, electroconvulsive therapy, psychotherapy (individual, marital, family and group therapy) and behavior therapy, Principles and methods of treatment applied to rehabilitation of psychiatrically ill individuals. Students should be familiar with terms such as impairment, disability and handicap.
- Various laws pertaining to the rights, treatment and care of individuals with psychiatric disorders such as Mental Health Act, Disability Act etc;
- Medical ethics in general and special ethical concerns as it applies to the practice of clinical psychiatry.
- Various theories of adult personality, learning theories, issues pertaining to intelligence and its measurement, psychological theories of emotion, motivational aspects of behavior, thinking, memory and developmental psychology.
- Principles and interpretation of psychological tests (adults, children) such as projective tests, tests of intelligence, tests of cognitive and neuro- psychological functions.
• Common instruments used in the diagnostic assessment and measurement of change in clinical status of various psychiatric disorders.
• Basic sciences as applicable to psychiatry such as Neurophysiology, neuroanatomy, neurochemistry, Genetics, Chronopsychobiology, General psychology, social psychology (Attitudes and its measurement, language and communication, culture, group dynamics, theories of attribution), anthropology and ethology.
• Student should be familiar with theoretical aspects of various neuroimaging techniques such as CT scan, PET scan, MRI etc., It is desirable that student should be able to interpret CT scan of the brain. Similarly, familiarity with various electrophysiological techniques such as EEG and evoked potentials is desirable, with a practical knowledge of EEG being necessary.
• Awareness of principles of research methodology and library work including collecting references and reviewing relevant literature is desirable.

Skill

A student must acquire practical skills in:

1. Interview techniques – both adults and children and of uncooperative patients.
2. Mental state examination including that of uncooperative patients.
3. Documentation of psychiatric history, family history and mental state examination.

Attitudes and communication abilities:

Students must learn to work with a multidisciplinary team including other mental health professionals. It is also essential that students learn to communicate effectively with physicians, other specialists and other health care agencies.

Teaching / Learning activities

A candidate pursuing the course should work in the institution as a full time student. No candidate should be permitted to run a clinic / laboratory / nursing home while studying postgraduate course. Each year should be taken as a unit for the purpose of calculating attendance.

Every student shall attend teaching and learning activities during each year as prescribed by the department and not absent himself / herself from work without valid reasons.
A list of teaching and learning activities designed to facilitate students acquire essential knowledge and skills is given below. Lectures: Lectures are to be kept to a minimum. They may, however, be employed for teaching certain topics. Lectures may be didactic or integrated.

a. Didactic Lectures: Recommended for selected common topics for post graduate students of all specialties. Few topics are suggested as examples:
   i) Bio – statistics
   ii) Use of library
   iii) Medical code of conduct of Medical Ethics.
   iv) National Health and Disease Control Programmes with special reference to National Mental Health Programmes.
   v) Communication Skills etc.

These topics may preferably taken up in the first few weeks of the 1st year.

b. Integrated Lectures: These are recommended to be taken by multidisciplinary teams for selected topics, eg. Basic sciences, psychology, sociology and allied sciences.

1. **Journal Club:** Recommended to be held once a week. All the PG students are expected to attend and actively participate in discussion and enter in the log book relevant details. Further, every candidate must make a presentation from the allotted journal(s), selected articles at least three times a year and a total of 6 seminar presentations in two years. The presentations would be evaluated using check lists and would carry weightage for internal assessment. (See checklist in Chapter IV). A time table with names of the student and the moderator should be announced in advance.

2. **Subject Seminar:** Recommended to be held once a week. All the PG students are expected to attend and actively participate in discussion and enter in the Log book relevant details. Further, every candidate must present on selected topics as least three times a year and a total of 6 seminar presentations in three years. The presentations would be evaluated using check lists and would carry weightage for internal assessment. (See checklist in Chapter IV). A time table for the subject with names of the student and the moderator should be announced in advance.

3. Out-patient clinics and follow up work.

4. Ward Rounds: Ward rounds may be service or teaching rounds.
   a. Service rounds: Post graduate should do every day for the care of the patients. Newly admitted patients should be worked up by the PGs and presented to the seniors the following day.
b. Teaching rounds: Every unit should have ‘grand rounds’ for teaching purpose. A dairy should be maintained for day to day activities by the students.
c. A minimum of 40 clinical cases must be seen every year and a minimum 10 cases be taken up for psychotherapy each year.

Entries of a, b and c should be made in the Log book.

5. Clinico – case conferences: Candidates should periodically present cases, which will be assessed using check lists (See model checklist in Chapter IV)

6. Inter departmental meetings: Strongly recommended particularly with departments of Pathology and Radio – Diagnosis at least once a week. These meetings should be attended by post graduate students and relevant entries must be made in the log book.

7. Radio – diagnosis: Interesting cases and the imaging modalities should be discussed.

8. Continuing medical education programmes (CME): Recommended that at least one state level CME programmes should be attended by each student in 2 years.

9. Conferences: Attending conferences is optional. However it is encouraged.

10. Psychometry / Psychotherapy Records:

Five fully worked-out diagnostic and Psychotherapy Records, out of which one should be child therapy record. The records should include a summary of the clinical history organized under relevant headings, and a discussion on:

a. reasons for intervention(s),
b. areas to be focused including short- and long-term objectives,
c. type and technique of intervention employed and rationale
d. therapy processes,
e. changes in therapy or objectives, if any, and the reasons for the same,
f. outcome,
g. prevention strategies,
h. future plans
Graded responsibility in care of patients

1st Year:

Interview techniques, mental state examination, diagnostic summary, diagnostic formulation, supervised inpatient and outpatient work, Supervised administration of ECT, administration and interpretation of psychological tests (projective tests, tests of intelligence, neuropsychological tests).

2nd Year

Supervised consultation and liaison work with order departments, evaluation and treatment of psychiatric emergencies under supervision, supervised long term follow up of inpatients discharged to the community, individual psychotherapy of a minimum of one case under supervision, exposure of group therapy family therapy. Student shall learn certain behavior therapy techniques such as relaxation, systematic desensitization, exposure and response prevention. Assessment and evaluation of children with psychiatric problems. Postings in the Department of Neurology (2 months) and in a psychiatric institution for exposure to Forensic Psychiatry (15 days).

Independent care of long term stable patients in the community and outpatient.

Learning to liaise with agencies outside the hospital setting for community care of patients and if possible to work in a centre dealing with rehabilitation of chronic psychiatrically ill patients (15 days)

Rotation and posting in other departments

Allied Subjects:

- Department of Neurology (3 months duration)
- Department of Medicine – Consultation – Liaison Psychiatry (1 month)
- Forensic psychiatry – 15 days
- Department of clinical psychology (where a separate department exists) or supervised clinical work under a clinical psychologist – 1 month duration.
- Child Psychiatry – 1 month.

Orientation Programme

Orientation programme regarding use of library, laboratory and hospital procedures, regulations concerning hospital admission and discharges during the first two months of clinical posting.
Monitoring Learning Progress

It is essential to monitor the learning progress of each candidate through continuous appraisal and regular assessment. It not only also helps teachers to evaluate students, but also students to evaluate themselves. The monitoring be done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment be done using checklists that assess various aspects. Checklist are given in Chapter IV.

The learning out comes to be assessed should included:

1. Personal Attitudes,
2. Acquisition of knowledge and
3. Clinical and operative skills.

1. **Personal Attitudes:** The essential items are:
   - Caring attitudes
   - Initiative
   - Organizational ability
   - Potential to cope with stressful situations and undertake responsibility
   - Trust worthiness and reliability
   - To understand and communicate intelligibly with patients and others
   - To behave in a manner which establishes professional relationships with patients and colleagues
   - Ability to work in team.
   - A critical enquiring approach to the acquisition of knowledge.

The methods used mainly consist of observation. It is appreciated that these items require a degree of subjective assessment by the guide, supervisors and peers.

2. **Acquisition of Knowledge:** The methods used comprise of ‘Log Book’ which records participation in various teaching / learning activities by the students. The number of activities attended and the number in which presentations are made are to be recorded. The log book should periodically be validated by the supervisors. Some of the activities are listed. The list is not complete. Institutions may include additional activities, if so, desired.

   a. **Journal review meeting (Journal Club):** The ability to do literature search, in depth study, presentation skills, and use of audio – visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting using a checklist (see Model Checklist – I, Chapter IV).
b. **Seminars / Symposia:** The topics should be assigned to the student well in advance to facilitate in depth study. The ability to do literature search, in depth study, presentation skills and use of audio–visual aids are to be assessed using a checklist (see Model Checklist II, Chapter IV).

c. **Clinico–pathological conferences:** This should be a multidisciplinary case study of an interesting case to train the candidate to solve diagnostic and therapeutic problems by using an analytical approach. The presentation(s) are to be assessed using a checklist similar to that used for seminar.

3. **Clinical Skills:**

   a. **Day to Day work:** Skills in outpatient and ward work should be assessed periodically. The assessment should include the candidate’s sincerity and punctuality, analytical ability and communication skills (see Model Checklist III, Chapter IV).

   b. **Clinical Meeting:** Candidates should periodically present cases to his peers and faculty members. This should be assessed using a checklist (see Model Checklist IV, Chapter IV).

   c. **Clinical and Procedural skills:** The candidate should be given graded responsibility to enable learning by apprenticeship. The performance is assessed by the guide by direct observation. Particulars are recorded by the student in the log book. (Table No. 3, Chapter IV).

4. **Periodic tests:** The department may conduct three tests, two of them be annual tests, one at the end of first year and the other in the second year. The third test may be held three months before the final examination. The tests may include written papers, practical / clinical and viva voce.

5. **Work diary / Look Book:** Every candidate shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical or laboratory procedures, if any conducted by the candidate.

6. **Records:** Records, log books and marks obtained in tests will be maintained by the Head of the Department and will be made available to the University or MCI.
Log Book

The log book is a record of the important activities of the candidates during his training, internal assessment should be based on the evaluation of the log book. Collectively, log books are a tool for the evaluation of the training programme of the institution by external agencies. The record includes academic activities as well as the presentations and procedures carried out by the candidate.

Format for the log book for the different activities is given in Tables 1, 2 and 3 of Chapter IV. Copies may be made and used by the institutions.

Procedure for defaulters: Every department should have a committee to review such situations. The defaulting candidate is counseled by the guide and head of the department. In extreme cases of default the departmental committee may recommended that defaulting candidate be withheld from appearing the examination, if she/he fails to fulfill the requirements in spite of being given adequate chances to set himself or herself right.

Scheme of Examination

1. Theory: There shall be four question papers, each of three hours duration. Each paper shall consist of two long essay questions each questions carrying 20 marks and 6 short essay questions each carrying 10 marks. Total marks for each paper will be 100. Questions on recent advances may be asked in any or all the papers. Details of distribution of topics for each paper will be as follows:

Paper I: Applied basic sciences and behavioral sciences, neuroanatomy, neurophysiology, neurochemistry, genetics, general and abnormal psychology, social psychology, anthropology, ethology biostatistics, neurology and general medicine related to psychiatry.

Paper II: History of psychiatry, classificatory systems in psychiatry, adult psychiatric disorders including personality disorder substance related disorders, sexual disorders, eating disorders, sleep disorders (epidemiology aetio-pathogenesis, clinical features, treatment course and outcome). psychosomatic disorders, consultation – liaison psychiatry, geriatric psychiatry, psychiatric emergencies, psycho-oncology, psychoneuroimmunology, psychoneuroendocrinology, chronopsychobiology, electrophysiological procedures and brain imaging in psychiatry.

Paper III: Child and adolescent psychiatric disorders including mental retardation (epidemiology aetio-pathogenesis, clinical features treatment course and outcome). Mental health issues in women including post-partum psychiatric disorders, measurements in psychiatry, psychopharmacology, electroconvulsive therapy, psychosurgery, psychotherapy, rehabilitation in psychiatry, forensic psychiatry, cultural psychiatry, community psychiatry and ethics in psychiatry.
Note: The distribution of chapters / topics shown against the papers are suggestive only.

2. Clinical Examination

Board of examination: The board of examiners consist of four members.

Out of four one should be Neurologist / Clinical Psychologist

Aim of the clinical examination is to elicit the knowledge and competency of the candidate for undertaking independent work as specialist / teacher

CHAPTER IV

Monitoring Learning Progress

It is essential to monitor the learning progress of each candidate through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also students to evaluate themselves. The monitoring shall be done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment be done using checklists that assess various aspects. Model checklists are given in this chapter which may be copied and used.

The learning outcomes to be assessed should include:

1. Personal Attitudes.
2. Acquisition of Knowledge.
3. Clinical and operative skills and
4. Teaching skills.

1. **Personal Attitudes:** The essential items are:
   a. Caring attitude.
   b. Initiative.
   c. Organisational ability.
   d. Potential to cope with stressful situations and undertake responsibility.
   e. Trust worthiness and reliability.
   f. To understand and communicate intelligibly with patients and others.
   g. To behave in a manner that establishes professional relationships with patients and colleagues.
   h. Ability to work in a team.
   i. A critical enquiring approach to the acquisition of knowledge.

   The methods used mainly consist of observation. It is appreciated that these items require a degree of subjective assessment by the guide, supervisors and peers.

2. **Acquisition of Knowledge:** The methods used comprise of 'Log Book' which records participation in various teaching / learning activities by the students. The number of activities attended and the number in which presentations are made are to be recorded. The log book should periodically be validated by the supervisors. Some of the activities are listed. The list is not complete. Institutions may include additional activities, if so, desired.
a. **Journal Review Meeting (Journal Club).** The ability to do literature search, in-depth study, presentation skills, and use of audio-visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting using a checklist (see Model Checklist – I, Chapter IV)

b. **Seminars / Symposia.** The topics should be assigned to the student well in advance to facilitate in-depth study. The ability to do literature search, in-depth study, presentation skills and use of audio-visual aids are to be assessed using a checklist (see Model Checklist-II, Chapter IV)

c. **Clinico-pathological conferences.** This should be a multidisciplinary study of an interesting case to train the candidate to solve diagnostic and therapeutic problems by using an analytical approach. The presenter(s) are to be assessed using a check list similar to that used for seminar.

d. **Medical Audit.** Periodic morbidity and mortality meeting shall be held. Attendance and participation in these must be insisted upon. This may not be included in assessment.

3. **Clinical skills:**
   a. **Day to Day work:** Skills in outpatient and ward work should be assessed periodically. The assessment should include the candidates’ sincerity and punctuality, analytical ability and communication skills (see Model Checklist III, Chapter IV).
   
   b. **Clinical meetings:** Candidates should periodically present cases to his peers and faculty members. This should be assessed using a check list (see Model checklist IV, Chapter IV).
   
   c. **Clinical and Procedural skills:** The candidate should be given graded responsibility to enable learning by apprenticeship. The performance is assessed by the guide by direct observation. Particulars are recorded by the student in the log book. (Table No.3, Chapter IV)

4. **Teaching skills:** Candidates should be encouraged to teach undergraduate medical students and paramedical students, if any. This performance should be based on assessment by the faculty members of the department and from feedback from the undergraduate students (See Model checklist V, Chapter IV)

5. **Periodic tests:** In case of degree courses of three years duration, the department may conduct three tests, two of them be annual tests, one at the end of first year and the other in the second year. The third test may be held three months before the final examination. In case of diploma courses of two
year duration, the departments may conduct two tests. One of them at the end of first year and the other in the second year, three months before the final examination. The tests may include written papers, practical / clinical and viva voce.

6. **Work diary**: Every candidate shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical or laboratory procedures, if any conducted by the candidate.

7. **Records**: Records, log books and marks obtained in tests will be maintained by the Head of the Department and will be made available to the University or MCI.

8. **Log book**: The log book is a record of the important activities of the candidates during his training. Internal assessment should be based on the evaluation of the log book. Collectively, log books are a tool for the evaluation of the training programme of the institution by external agencies. The record includes academic activities as well as the presentations and procedures carried out by the candidate. Format for the log book for the different activities is given in Tables 1, 2 and 3 of Chapter IV. Copies may be made and used by the institutions.

**Procedure for defaulters**: Every department should have a committee to review such situations. The defaulting candidate is counseled by the guide and head of the department. In extreme cases of default the departmental committee may recommend that defaulting candidate be withheld from appearing the examination, if she/he fails to fulfill the requirements in spite of being given adequate chances to set him or herself right.

Chapter V
Medical Ethics
Sensitisation and Practice

Introduction

There is now a shift from the traditional individual patient-doctor relationship and medical care. With the advances in science and technology and the needs of patients, their families and the community, there is an increased concern with the health of society. There is a shift to greater accountability to the society. Doctors and health professionals are confronted with many ethical problems. It is, therefore necessary to be prepared to deal with these problems. To accomplish the Goal and General Objective stated in Chapter II and develop human values it is urged that ethical sensitisation be achieved by lectures or discussion on ethical issues, clinical discussion of cases with an important ethical component and by including ethical aspects in discussion in all case presentation, bedside rounds and academic postgraduate programmes.

Course Contents

1. Introduction to Medical Ethics
   - What is Ethics?
   - What are values and norms?
   - Relationship between being ethical and human fulfillment.
   - How to form a value system in one's personal and professional life.
   - Heteronomous Ethics and Autonomous Ethics.
   - Freedom and personal Responsibility.

2. Definition of Medical Ethics
   - Difference between medical ethics and bio-ethics
   - Major Principles of Medical Ethics
     - Beneficence = fraternity
     - Justice = equality
     - Self determination (autonomy) = liberty

3. Perspective of Medical Ethics
   - The Hippocratic Oath.
   - The Declaration of Helsinki.
   - The WHO Declaration of Geneva.
   - International code of Medical Ethics. (1993)
   - Medical Council of India Code of Ethics.
4. Ethics of the Individual

- The patient as a person.
- The Right to be respected.
- Truth and Confidentiality.
- The autonomy of decision.
- The concept of disease, health and healing.
- The Right to health.
- Ethics of Behaviour modification.
- The Physician – Patient relationship.
- Organ donation.

5. The Ethics of Human life

- What is human life?
- Criteria for distinguishing the human and the non-human.
- Reasons for respecting human life.
- The beginning of human life.
- Conception, contraception.
- Abortion.
- Prenatal sex-determination.
- In vitro fertilization (IVF).
- Artificial Insemination by Husband (AIH).
- Artificial Insemination by Donor (AID).
- Surrogate motherhood.
- Semen Intra-fallopian Transfer (SIFT).
- Gamete Intra-fallopian Transfer (GIFT).
- Zygote Intra-fallopian Transfer (ZIFT).
- Genetic Engineering.

6. The Family and Society in Medical Ethics

- The Ethics of human sexuality.
- Family Planning perspectives.
- Prolongation of life.
- Advanced life directives – The Living Will
- Euthanasia
- Cancer and Terminal Care

7. Profession Ethics

- Code of conduct.
- Contract and confidentiality.
- Charging of fees, Fee-splitting.
- Prescription of drugs.
- Over-investigating the patient.
• Low – Cost drugs, vitamins and tonics.
• Allocation of resources in health care.
• Malpractice and Negligence.

8. Research Ethics

• Animal and experimental research / humaneness.
• Human experimentation.
• Human volunteer research — Informed Consent Drug trials.

9. Ethical workshop of cases

• Gathering all scientific factors.
• Gathering all human factors.
• Gathering all value factors.
• Identifying areas of value — conflict, setting of priorities
• Working out criteria towards decisions.
